>Dear Monika

>The meeting on Zaule LNG you refer to was not agreed with us during the 11  
>th march NSI East gas meeting.  
>Indeed we think is not appropriate for the reason we explained in the  
>previous mail on 14th of march that I attach here again

>  
>Dear Monika,

>  
>This mail represents a first reaction to the position paper circulated from  
>the Slovenian authority in the NSI East gas working group's meeting held on  
>the 11th of March in Brussels.

>I will hereafter present our arguments against the request of Slovenia to  
>reject the Zaule LNG from the PCI eligible list, while an official position  
>of Italian Ministry on other specific contents of the Slovenian paper will  
>follow in the next days.

>  
>1. Slovenia asserts that the result of the eligibility assessment is  
>questionable because the project in their views does not fulfill the  
>criteria set in art.4 of the TEN-E Regulation. However they do not explain  
>specifically which criteria is not fulfilled.  
>As we all know that the Commission, with the support of consultants, is  
>competent for assessing the eligibility and the scoring of projects, the  
>Slovenian authorities are indeed expressing mistrust on the accuracy of the  
>quantitative and qualitative analysis made so far by the Commission,  
>without bringing any objective element in support of their questioning.  
>Therefore a re-assessment of the Zaule project would be not only  
>discriminatory but also unjustifiable.

>  
>2. Slovenia asks that the initiator of the project conducts and  
>presents further analysis on the fulfillment of the criteria under art. 4  
>of Regulation. We take position against this request because, for the same  
>reasons presented above and also because this is not provided in the  
>Regulation - and therefore cannot be demanded, it would be again  
>unjustifiable and discriminatory against one project compared to others.

>  
>3. Slovenia says to be reluctant regarding the cross-border impact of  
>the project. However, we underline that the cross-border impact considered

>for Zaule LNG regards the Austrian border and that this impact, as for all  
>other projects, has been verified by the Commission with the NRAs.  
>Therefore we find it inappropriate that Slovenia questions the reliability  
>of the cross-border impact assessed by authorities of other MSs on borders  
>that do not interest its territory.

>

>

>4. As said before, on all issues regarding environmental impact  
>assessment, safety and healthy risk, we will reply with a separate official  
>position paper; however I want here to point out that all concerns  
>regarding environmental impact assessments and permitting procedures must  
>not at all taken into account when assessing a project for the aim of  
>filing the PCI list. This emerges clearly from the Regulation, that does  
>not require that the PCI have already performed the EIA.

>

>Therefore, the regional working groups and the Commission that coordinates  
>and chairs the works should not allow that this issues are taken in during  
>the process of identification of PCI. Indeed we cannot exclude that  
>environmental concerns may be raised in the future for all those PCI that  
>have get a positive EIA yet.

>

>As a closing remark let me just remind you that Zaule project is totally on  
>the Italian territory and therefore the approval of Slovenia is not  
>required for its inclusion in the PCI list (art. 3 of TEN-E Regulation).

>

>Kind regards,

>

>Paola Arbia

>

>

>Dear members of the NSI East gas regional working group, dear project

>promoters,

>

>Please find the Commission's presentation slides of the March 11th meeting

>attached for your information.

>

>

>A quick summary of what has been agreed at the meeting:

>· The group agreed on the set of non-eligible projects as presented

>at the meeting

>· Clustering proposals were agreed as presented with the following

>additional changes (final comments still welcome): G68 and G120 as part of

>the Krk LNG cluster; G2 independent;

>· Separate meeting to be organized on Zaule LNG in Trieste before  
>next working group meeting  
>· Storages: check reasons behind changes of scores between January  
>and now. This has been done, the main reasons were the finalization of the  
>region of impact and the different level of contribution of projects to  
>"elimination of bottlenecks"  
>· The top 13 projects are proposed to be on the final list, the  
>rest to be discussed further  
>· For presentation reasons, projects will be grouped under logical  
>'axis'  
>  
>We will send the more detailed meeting minutes for your comments early next  
>week. Could you please send your comments on the topics discussed during  
>the meeting by March 18th , if possible.  
>  
>Kind regards and have a nice weekend,
